

The diagram illustrates the addition of two 2x2 grids of squares. The first grid consists of four white squares, each containing the variable x . The second grid consists of two white squares in the bottom row and two cyan squares in the top row. The sum of these two grids is a 2x2 grid consisting of two white squares in the bottom row and two light blue squares in the top row.

$$\begin{array}{|c|c|} \hline x & x \\ \hline x & x \\ \hline \end{array} + \begin{array}{|c|c|} \hline \text{cyan} & \text{cyan} \\ \hline x & x \\ \hline \end{array} = \begin{array}{|c|c|} \hline \text{light blue} & \text{light blue} \\ \hline x & x \\ \hline \end{array}$$
