

The diagram illustrates the following equation:

$$\begin{bmatrix} x \\ 0 \\ 0 \\ 0 \end{bmatrix} + \begin{bmatrix} 1 \\ 1 \\ 0 \\ 0 \end{bmatrix} + \begin{bmatrix} 1 \\ 1 \\ 0 \\ 0 \end{bmatrix} = \begin{bmatrix} 1 & 1 \\ 1 & 1 \\ 1 & 1 \\ 0 & 0 \end{bmatrix} + \begin{bmatrix} 1 \\ 1 \\ 0 \\ 0 \end{bmatrix}$$

The visual representation uses squares to denote the elements of the vectors and matrices. The first square is white with a black border and contains the variable x . The second and third squares are cyan with black borders. The result is a 3x2 grid of light blue squares with black borders, followed by a plus sign and a single light blue square with a black border.
